<sup>(1)</sup>Estimates of charge accounts and instalment receivables outstanding on the books of retail dealers do not include Newfoundland. In the case of other items, Newfoundland estimates have been included, as available, commencing June 30, 1949. <sup>(2)</sup>Charge accounts receivable outstanding on the books of retail dealers. Excludes Newfoundland.

<sup>(3)</sup>Instalment receivables outstanding on the books of retail dealers. Excludes Newfoundland. <sup>(4)</sup>Instalment paper held by sales finance and acceptance companies in connection with the financing of retail purchases of consumer goods, largely new and used automobiles. <sup>(5)</sup>Includes estimated personal loans by chartered banks, small loan companies, licensed money lenders and credit unions.

Beginning with April, 1950, Newfoundland is included.

<sup>(1)</sup>In the upper section of this table, the annual statistics prior to 1951 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over. <sup>(2)</sup>Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

<sup>(1)</sup>Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month.

<sup>(2)</sup>From July, 1954, the figures are not adjusted for items in transit.

<sup>(3)</sup>Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent.

<sup>(4)</sup>Mainly deposits of foreign banks.

<sup>(5)</sup>Including issues payable in foreign currency.

<sup>(6)</sup>Excluding Canadian day-to-day loans. <sup>(7)</sup>Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. \*Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On a comparable basis, the Canada total in April, 1955 was 17% above that of April, 1951. Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada excluding government-owned companies and incorporated co-operatives).

<sup>(1)</sup> Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

<sup>(2)</sup> Includes, in addition to the industries listed, Tobacco.

Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

<sup>(3)</sup> Includes Printing and Publishing and Allied Industries.

<sup>(4)</sup> For 1953 and 1954, these totals do not equal the sum of the totals for the individual groups. It is estimated that total profits before taxes may exceed the sum of the groups by about \$11,000,000 per quarter in 1953 and \$14,000,000 per quarter in 1954. Although the totals have been adjusted by these amounts it is not possible at present to allocate the differences to the individual groups.

1953 1954 1955  
Jan.-May Totals

Canada's domestic exports in the first six months of 1955 of \$2,031 million were 10 per cent higher than in the same part of 1954 and 2 per cent above the first half of 1953. The gain from 1954 represented almost entirely a higher volume of shipments, as prices on average in the first part of 1955 were almost unchanged. This recent strength in exports has been associated with rising output and income in the United States, and general high levels of activity in the United Kingdom and certain other countries which form a substantial part of the external market for Canadian products. The rise in exports to the United Kingdom in the first half of 1955 was particularly notable, with a gain of about 35 per cent over the same part of 1954.

The increases in exports have been general both geographically and in terms of the range of commodities experiencing gains. Advances have been most evident in three of the major commodity groups - the wood and paper group, non-ferrous metals and their products, and in chemicals and chemical products. Within these

SOME OF CANADA'S LEADING EXPORTS WHICH WERE LOWER IN 1954 HAD NOT REGAINED THEIR HIGH 1953 LEVELS

OTHERS WHICH HAD FALLEN OFF IN THE FIRST PART OF 1954 WERE HIGHER AGAIN IN 1955

(MILLIONS OF DOLLARS)

CONTINUED GAINS WERE SHOWN IN THE COMMODITIES NOTED BELOW.

\* Detail for June not available.

groups, as the accompanying table and the following chart illustrate, major gains have taken place in exports of planks and boards, newsprint paper, wood pulp, nickel, aluminium, copper and their products. In addition to the above commodities, which have long been among Canada's principal exports, there have been pronounced advances in some commodities, the production of which has been expanded by substantial investment in recent years. These include petroleum, iron ore and certain chemical products.

It may be noted that in 1954 the net decline in exports can be traced almost entirely to two types of commodities - grains and motor vehicles. Fluctuations in grain exports in recent years, reflecting changing market and supply conditions, accounted for a substantial part of the increase in domestic exports in 1952 as well as the subsequent fall-off. Despite recent declines, both value and volume of grain exports were higher in 1954 than in any post-war year prior to 1951. In the first half of 1955 grain exports have been relatively stable compared with the same part of last year.

In the accompanying chart it is evident that while grains and motor vehicles have not contributed to the general increase in exports during 1955, they have not constituted a negative factor as they did in the previous year.

In 1955, on the other hand, the expansion of exports of wood, paper, non-ferrous metals and chemicals and their products appears to reflect a continuation of an upward trend since 1946. The rate of increase in exports of these commodities to the United States had slackened in early 1954 when economic activity in that country declined, but, there were offsetting increases (particularly for wood and its products and, to a lesser extent, for the non-ferrous metal group), as activity in the United Kingdom and other countries expanded. With the return of the upward movement in production in the United States, exports of these commodities have made pronounced gains.

The following table shows that the strength in these two principal markets, the United States and the United Kingdom, accounted for a major part of the increase in total domestic exports in the first half of 1955, with other Commonwealth countries contributing a smaller

part of the gain. On balance, exports to other countries were lower reflecting in a large part reduced shipments to Brazil and Japan. This net decline in exports to other countries, however, conceals some advance in shipments to Europe, particularly to Western Germany, Belgium and Luxembourg and to the Netherlands.

To sum up, the increase in domestic exports between the first half of 1954 and the first half

of 1955 has been associated with a continuation of advances in the commodity groups noted immediately above, rather than with any increase in those groups which had experienced major declines in 1954. The expansion of exports, furthermore, has rested on a fairly wide geographical base, with the most significant areas being Canada's major markets of the United States and the United Kingdom.

(1)For newsprint, gold and power, Newfoundland data are included as of April, 1949, May, 1949 and January, 1950 respectively. (2)Data exclude Indians on Reservations. Newfoundland included as of March, 1950. (3)For purposes of this comparison, persons without jobs and seeking work have been added to the total of paid workers with jobs. (4)Includes only those not at work and seeking work. (5)Includes supplementary benefit claimants from December to March. Newfoundland included as of April, 1949. (6)Conversions are included with annual data only. (7)Annual figures are survey averages.

Note.—Until the end of 1953, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1953 have been revised accordingly. Monthly figures for 1954 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

<sup>(1)</sup>Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952. <sup>(2)</sup>Exclusive of stillbirths. <sup>(3)</sup>Not applicable to figures on population. <sup>(4)</sup>Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951.

<sup>(5)</sup>Monthly average.

8 <sup>(1)</sup>Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

<sup>(2)</sup>This item differs from column 4, top of page 7, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

Note: Newfoundland is represented as of 1949.

Reported by firms customarily employing 15 persons or more. Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period of the preceding month.

\*Average weekly wages and salaries.

<sup>(1)</sup>Excludes gold. <sup>(2)</sup>Arithmetically converted from 1935-39=100. <sup>(3)</sup>Excluding Newfoundland. The prices of western grains prior to August, 1954, are final prices whereas those used since are initial prices for wheat and initial prices plus interim payments for oats and barley. \*Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipment universe for the industry from the Annual Census of Industry Survey.

<sup>(1)</sup>Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of all manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953. <sup>(2)</sup>Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

40 Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint. <sup>(1)</sup>Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. <sup>(2)</sup>Total pulp production covers "screening" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. <sup>(3)</sup>Mill shipments destined for export.

\*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

<sup>(1)</sup>The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

<sup>(2)</sup>As of January, 1950, Newfoundland is included.

46 (1)Planks and boards, flooring and square timber. (2)Includes Newfoundland as of May, 1949. (3)Hollow blocks including fireproofing and bearing tile. (4)For building insulation only. (5)Figures cover the production of firms which normally account for 85 per cent of the total for Canada. (6)Incl. concrete chimney blocks. (7)Factory sales of firms which normally account for 96% of total Canadian production.

<sup>1</sup>Estimates of charge accounts and installment receivables outstanding on the books of retail dealers do not include Newfoundland. In the case of other items, Newfoundland estimates have been included, as available, commencing June 30, 1949. <sup>2</sup>Charge accounts receivable outstanding on the books of retail dealers. Excludes Newfoundland.

<sup>3</sup>Installment receivables outstanding on the books of retail dealers. Excludes Newfoundland. <sup>4</sup>Installment paper held by sales finance and acceptance companies in connection with the financing of retail purchases of consumer goods, largely new and used automobiles. <sup>5</sup>Includes estimated personal loans chartered banks, small loan companies, licensed money lenders and credit unions.

Beginning with April, 1950, Newfoundland is included.

In the upper section of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over.

<sup>(2)</sup>Operating income equals operating revenues less operating expenses adjusted for tax accruals and depreciation of equipment and joint facilities.

Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month and while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. (2) From July, 1954, the figures are not adjusted for items in transit. (3) Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent. (4) Mainly deposits of foreign banks. (5) Including issues payable in foreign currency. (6) Excluding Canadian day-to-day loans. (7) Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. \*Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On a comparable basis, the Canada total in May, 1955 was 11% above that of May, 1951. Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartford, Conn.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all manufacturing companies less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (including government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

(2) Includes, in addition to the industries listed, Tobacco,

(3) Includes Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(4) Includes Printing and Publishing and Allied Industries.

(5) For 1953 and 1954, these totals do not equal the sum of the totals for the individual groups. It is estimated that total profits before taxes may exceed the sum of the totals for the individual groups by about \$11,000,000 per quarter in 1953 and \$14,000,000 per quarter in 1954. Although the totals have been adjusted by these amounts it is not possible to allocate the differences to the individual groups.

<sup>(1)</sup>For newsprint, gold and power, Newfoundland data are included as of April, 1949, May, 1949 and January, 1950 respectively.<sup>(2)</sup>Data exclude Indians

Reservations. Data includes Newfoundland.

<sup>(3)</sup>For purposes of this comparison, persons without jobs and seeking work have been added to the total of paid workers with jobs.<sup>(4)</sup>Includes only those not at work and seeking work.<sup>(5)</sup>Includes supplementary benefit claimants from December to March. Newfoundland included as of April, 1949.<sup>(6)</sup>Conversions are included with annual data only.<sup>(7)</sup>Annual figures are survey averages.

4 Note.—Until the end of 1953, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. D. for 1953 have been revised accordingly. Monthly figures for 1954 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

(1) Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952. (2) Exclusive of stillbirths. (3) Not applicable to figures population. (4) Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951.

(5) Monthly average.

<sup>(1)</sup>Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

<sup>(2)</sup>This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board.

Note: Newfoundland is represented as of 1949.

Reported by firms customarily employing 15 persons or more. Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period of the preceding month.

\*Average weekly wages and salaries.

<sup>(1)</sup>Includes gas used for house heating.

<sup>(2)</sup>Barrels of 35 Imperial gallons.

<sup>(3)</sup>Increase in natural gas sales and decrease in manufactured gas sales caused transfer of large company from manufactured to natural gas.

34 \*Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments universe for the industry from the Annual Census of Industry Survey.

<sup>(1)</sup> Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported sales to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953. <sup>(2)</sup> Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Source: Monthly Report of Inventories, Shipments and Orders in Manufacturing Industries, and Quarterly Report on Estimated Value of Manufacturers' Shipments, D.B.S.

Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint. <sup>(1)</sup>Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. <sup>(2)</sup>Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. <sup>(3)</sup>Mill shipments destined for export.

<sup>(1)</sup>As of January, 1950 includes some silvery pig iron formerly included with ferro-alloys. <sup>(2)</sup>Excluding producers' interchange. <sup>(3)</sup>Since 1946 imports include, in addition to all other shapes, wire and wire rope. Beginning January 1954, imports exclude castings, forgings, fittings and couplings. <sup>(4)</sup>Monthly average. Source: Primary Iron and Steel, D.B.S.

\*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

<sup>(1)</sup>The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

<sup>(2)</sup>As of January, 1950, Newfoundland is included.

<sup>(1)</sup>Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.

<sup>(2)</sup>Exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.

<sup>(3)</sup>Annual data are monthly averages of crop year.

<sup>(4)</sup>Includes eggs for hatching.

Beginning with April, 1950, Newfoundland is included.

<sup>(1)</sup>In the upper section of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over.<sup>(2)</sup>Operating income equals operating revenues less operating expenses adjusted for tax accruals and

rent of equipment and joint facilities.

<sup>(1)</sup>Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month.

<sup>(2)</sup>From July, 1954, the figures are not adjusted for items in transit.

<sup>(3)</sup>Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent.

<sup>(4)</sup>Mainly deposits of foreign banks.

<sup>(5)</sup>Including issues payable in foreign currency.

<sup>(6)</sup>Excluding Canadian day-to-day loans.

<sup>(7)</sup>Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789.

Note.—This series gives total new settled-for-ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. \*Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On comparable basis, the Canada total in June, 1955 was 12% above that of June, 1954. Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartford, Conn.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada including government-owned companies and incorporated co-operatives.

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

(2) Includes, in addition to the industries listed, Tobacco,

Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(3) Includes Printing and Publishing and Allied Industries.

(4) For 1953 and 1954, these totals do not equal the sum of the totals for the individual groups. It is estimated that total profits before taxes may exceed the sum of the groups by about \$11,000,000 per quarter in 1953 and \$14,000,000 per quarter in 1954. Although the totals have been adjusted by these amounts it is not possible to present to allocate the differences to the individual groups.

# Current Economic Conditions

## SELECTED COMPONENTS OF INCOME AND EXPENDITURE (AT SEASONALLY ADJUSTED ANNUAL RATES)

GROSS NATIONAL PRODUCT ROSE AT A SHARPER RATE IN THE SECOND QUARTER

BILLIONS OF DOLLARS

MAJOR GAINS WERE MADE IN WAGES AND SALARIES AND INVESTMENT INCOME (INCLUDING CORPORATION PROFITS)

BILLIONS OF DOLLARS

RIISING CONSUMER OUTLAYS ACCOUNTED FOR ABOUT HALF THE INCREASE IN FINAL EXPENDITURES

GOVERNMENT EXPENDITURES AND FIXED INVESTMENT OUTLAYS ALSO ADVANCED IN THE SECOND QUARTER

## Gross National Product Showed Pronounced Gain in Second Quarter of 1955

Canada's gross national product moved upward at an accelerated rate in the second quarter of 1955, as the expansion in economic activity which began in the last half of 1954 made a sharp advance. Gross national product was estimated to have reached \$26.2 billion in the second quarter (at seasonally adjusted annual rates), a gain of 4 per cent over the rate of the first quarter, and 9 per cent above the annual average for 1954 of \$24.0 billion. About \$300 million of the increase over last year is attributable to an estimated higher crop production in 1955.

With the elements of farm production eliminated, the general level of activity in the non-farm sector of the economy in the second quarter was 8 per cent above the 1954 annual average, and also 8 per cent above the peak reached in the third quarter of 1953 just prior to the down turn in activity. As prices were relatively stable throughout this period, these gains reflected almost entirely an expanded volume of output.

The recent advance, moreover, appears to have been more widely dispersed throughout the economy than that which occurred between the fourth quarter of 1954 and the first quarter of the current year with almost all industrial groups sharing in the general advance in production. Related indicators suggest that, after adjustment for seasonal factors, about one-half of the production gain from the first to second quarter occurred in manufacturing. In contrast to the first quarter, however, when the increase in manufacturing production was concentrated in durable goods (especially automobiles), the second quarter gains appear to have been quite widespread, with the major part of the advance occurring in the non-durable goods industries. It may be noted that the rise in manufacturing production, both durable and non-durable, in

recent quarters, has brought the level of production in this industry to a point approximately 8 per cent above the second quarter of 1954. In spite of these gains over last year, durable production had not reached the high levels of the second quarter of the year 1953, but non-durable production in the second quarter was running at a rate approximately 4 per cent above the mid-1953 level.

Outside of the manufacturing field, production gains from the first to second quarter of this year were also widely diffused, with the services, construction, and most of the primary industries sharing in the advance; the level of output for these industries was above that of the same part of last year, as the following chart illustrates.

Accompanying these gains in production, the total number of persons with jobs in the second quarter was about 3 per cent higher than in the same period of 1954. In the non-agricultural sector, the number of persons with jobs rose by about 4 per cent. At the same time, average hours worked per week in manufacturing were about 2 per cent higher than a year ago. The number of persons without jobs and seeking work had declined by 2 per cent below the level of last year's second quarter.

The vigorous pace of activity in the first six months of this year has been accompanied by major gains in most of the important segments of income and demand. The table below shows percentage increases for a number of selected aggregates since the first half of last year when economic activity had reached the low point of the recent down turn. Both personal and business incomes have shown striking gains since that time, and these in turn have been associated with the growth of a number of major expenditure categories.

**Percentage Change, First Half 1955 over First Half 1954**

Selected Income Aggregates		Selected Expenditure Aggregates	
Notional Income .....	+ 7.4%	Gross Notional Expenditure .....	+ 7.2%
Personal Income .....	+ 5.9%	Personal Expenditure .....	+ 5.7%
Wages and Salaries .....	+ 5.6%	Government Expenditure .....	+ 6.1%
Investment Income .....	+14.8%	Residential Construction .....	+27.4%
Government Transfer Payments .....	+ 9.1%	Exports .....	+10.4%
		Imports .....	+ 8.1%

On the expenditure side, major sources of strength in the half year have been the increase in consumers' outlays, substantially higher levels of housebuilding activity, and a sharp rise in exports of goods and services. The rate of business inventory accumulation has also been moderately higher, while some increase

has occurred in government expenditure on goods and services. Imports have responded to the increases in these demand categories, and have shown a sharp rise. On the other hand, outlays for new non-residential construction and machinery and equipment have shown minor declines in the first half of this year.

## MAJOR INDUSTRIAL GROUPS

(PERCENTAGE CHANGE)

## Components of Gross National Product

Reflecting the substantial gain in production and the accompanying rise in employment, wages and salaries seasonally adjusted reached an annual rate of \$12.7 billion in the second quarter of this year. This represents an increase of more than 3 per cent over the first quarter (on the seasonally adjusted basis), and of about 7 per cent over the same period of a year ago. In this last comparison, the number of paid workers was higher by about 4 per cent and average weekly earnings by about 3 per cent.

Investment income seasonally adjusted rose by 11 per cent from the first to second quarter

of 1955, to a level of \$4.4 billion at annual rates. This constitutes a gain of about 20 per cent over the second quarter of 1954. Corporation profits were the major factor in the increase and data available at present suggest a gain of the order of 20 per cent over last year's second quarter. The advances from a year ago and from the first to second quarter of this year again appear to have been quite general, with the majority of the industrial groups sharing in the increase.

Indirect taxes less subsidies, seasonally adjusted, rose moderately from the first to

second quarter to an annual rate of \$3.2 billion, 6 per cent above the level of the second quarter of the previous year. The gains were entirely attributable to indirect taxes, with subsidies showing little change. Featured in the increases over last year were customs import duties which rose by 11 per cent, accompanying the sharp rise in imports, and excise duties which rose by 15 per cent reflecting higher consumption of tobacco and alcoholic beverages.

### **Components of Gross National Expenditure**

Outlays by consumers for goods and services (seasonally adjusted) increased substantially from the first to the second quarter of 1955, with widespread gains in the non-durable goods group, and a large increase in purchases of durable goods associated with a sharp upswing in sales of new passenger automobiles. All major groups, durables, non-durables and services, were at new peaks in the second quarter, with increases of 15 per cent, 4 per cent, and 2 per cent, respectively, over the first quarter. These gains brought the total level of consumer expenditure in the second quarter to a point approximately 7 per cent above the level of the second quarter of 1954.

Government expenditure on goods and services, seasonally adjusted, rose moderately from the first to second quarter, reflecting for the most part a pickup in federal defence outlays (largely on non-procurement items), but also to a lesser degree small gains in non-defence outlays at the three levels of government. The second quarter rate of \$4.6 billion was thus about 7 per cent over the corresponding period for 1954. Defence expenditures, which contributed almost half of the gain over last year, were about 9 per cent higher. The growth in expenditures at the provincial and municipal levels of government reflected in part higher investment outlays for capital facilities.

Investment in new residential construction, seasonally adjusted, rose by approximately 12 per cent from the first to second quarter of 1955 and was at an annual rate of more than \$1.4 billion. This constitutes an increase of 33 per cent over the second quarter of last year, the largest single percentage gain of any major component of gross national expenditure.

Non-residential construction (seasonally adjusted) showed little change from the first to the second quarter of 1955, and was down slightly compared with the second quarter of 1954; in the first six months of this year, non-residential construction dropped by approximately 3 per cent from last year's levels. Investment in new machinery and equipment on the other hand, rose by 14 per cent from the first to the second quarter of 1955, the first major increase in this component since early in 1953.

The seasonally adjusted figures of inventory change indicate some accumulation in the second quarter. However, most of this accumulation can be ascribed to stocks of grain in commercial channels. Business inventories, seasonally adjusted, showed little change in the second quarter, but this minor change obscures offsetting movements within industries. Among these changes, it may be noted that manufacturing inventories, seasonally adjusted, were drawn down during the second quarter, reflecting the fact that shipments of motor vehicles from the factory were substantially in excess of the high rate of factory production. This rate of shipments of automobiles from the factories, in turn, was in excess of the high volume of car sales in the second quarter, with the result that some accumulation took place at the retail level.

Exports and imports of goods and services in the second quarter were 10 per cent and 1 per cent, respectively, above the same period a year earlier. After seasonal adjustment, the figures indicate that the high levels reached in the first quarter of this year were maintained: exports were running at \$5.6 billion while imports were at \$6.0 billion.

Non-agricultural exports of goods, seasonally adjusted, rose to a new high from the first to second quarter, but declines in exports of agricultural products offset this increase. For the first half of 1955, while exports of agricultural products were approximately unchanged from the same period of 1954, the total for all other commodities rose 12 per cent over the first half of 1954 and was 4 per cent above the first half of 1952, the previous peak. The strongest increases in exports in the half year comparison were in wood products, non-ferrous metals, non-metallic minerals and chemical products.

— Imports of goods rose sharply in most components in the second quarter relative to the first; this increase in goods was partly offset by a decline in services. The gain in imports of goods reflects the expansion in economic activity in Canada in the first half of this year from the low point a year ago. The upswing in manufacturing production, the cessation of inventory liquidation followed by some accumulation, and the continued growth of consumer expenditure, has been accompanied by rising import levels.

The level of personal saving has risen in the first half of 1955, as advances in personal income have been larger than the increase in consumer outlays and personal direct taxes. Thus, the rate of saving in the first six months of the year has amounted to about 9 per cent of personal disposable income, compared with about 7 per cent in the first half of 1954.

– Note –

### Changes in Tables 1, 2 and 3

With a view to increasing the scope and usefulness of Table 1 (Selected Economic Indicators) the statistical content has been re-organized. Several of the series previously published in this Table have been discontinued (they appear elsewhere in the Review) and replaced by indicators that, for purposes of the Table, are of more significance and larger scope. An attempt was made, also, to represent each major industrial division of the Standard Industrial Classification with at least one series to indicate the broad trend of activity in each group.

A similar revision was made in Tables 2 and 3 (Significant Statistics of the United Kingdom and of the United States). In the interests of uniformity, comparability with the Canadian series was maintained as much as possible, although, due to differences in timeliness, concepts and methods it was not always possible to do so.

4 Note.— Until the end of 1953, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. For 1953 have been revised accordingly. Monthly figures for 1954 are provisional and represent registrations filed in Provincial Vital Statistics offices during the year under review, regardless of the month of occurrence.

<sup>(1)</sup> Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952. <sup>(2)</sup> Exclusive of stillbirths. <sup>(3)</sup> Not applicable to figures for population. <sup>(4)</sup> Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1954.

<sup>(5)</sup> Monthly average.

<sup>(1)</sup>Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standards adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

<sup>(2)</sup>This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the C Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

<sup>(1)</sup>As of January 1954 and January 1955, a number of distributors not previously reporting were added to the survey.

<sup>(2)</sup>Includes gas used for house heat

<sup>(3)</sup>Barrels of 35 Imperial gallons.

<sup>(4)</sup>Increase in natural gas sales and decrease in manufactured gas sales caused by transfer of large company from manufacture to natural gas.

34 \*Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments for the industry from the Annual Census of Industry Survey.

<sup>(1)</sup> Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported sales to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953. <sup>(2)</sup> Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Source: Monthly Report of Inventories, Shipments and Orders in Manufacturing Industries, and Quarterly Report on Estimated Value of Manufacturers' Sales, D.B.S.

\*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample units lying outside these municipalities are also chosen for complete enumeration.

<sup>(1)</sup>The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

<sup>(2)</sup>As of January, 1950, Newfoundland is included.

<sup>(1)</sup>Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted. Annual data are monthly averages of crop year. <sup>(2)</sup>Includes eggs for hatching.

Beginning with April, 1950, Newfoundland is included.

<sup>(1)</sup>In the upper section of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over. <sup>(2)</sup>Operating income equals operating revenues less operating expenses adjusted for tax accruals and rental equipment and joint facilities.

<sup>(1)</sup>Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month and while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month.

<sup>(2)</sup>From July, 1954, the figures are not adjusted for items in transit. <sup>(3)</sup>Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent.

<sup>(4)</sup>Excluding Canadian day-to-day loans. <sup>(5)</sup>Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789.

<sup>(6)</sup>Mainly deposits of foreign banks. <sup>(7)</sup>Including issues payable in foreign currency.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and reinsurance bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. \*Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On a comparable basis, the Canada total in July, 1955 was 6% above that of July, 1954. Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (including government-owned companies and incorporated co-operatives).

<sup>(1)</sup> Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

<sup>(2)</sup> Includes, in addition to the industries listed, Tobacco.

<sup>(3)</sup> Includes Printing and Publishing and Allied Industries.

<sup>(4)</sup> For 1953 and 1954, these totals do not equal the sum of the totals for the individual groups. It is estimated that total profits before taxes may exceed the sum of the groups by about \$11,000,000 per quarter in 1953 and \$14,000,000 per quarter in 1954. Although the totals have been adjusted by these amounts it is not possible to allocate the differences to the individual groups.

<sup>(1)</sup>"De facto" population. Annual data are for June.

<sup>(2)</sup>At current market prices. Annual data are totals of the four quarters.

<sup>(3)</sup>Output of build-

and civil engineering work, excluding the output of building operatives employed by private firms outside the building and civil engineering industries.

<sup>(4)</sup>Ne-

series not strictly comparable with previous figures. Value for first quarter of 1955 on the former basis was £276 million.

4 Note.— Until the end of 1954, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. 1 a for 1954 have been revised accordingly. Monthly figures for 1955 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

<sup>(1)</sup>Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952. <sup>(2)</sup>Exclusive of stillbirths. <sup>(3)</sup>Not applicable to figures for population and immigration. <sup>(4)</sup>Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included January, 1951. <sup>(5)</sup>Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

Source: Monthly Report of Vital Statistics, D.B.S. and Department of Citizenship and Immigration.

8

<sup>(1)</sup>Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard season adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

<sup>(2)</sup>This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

Note: Newfoundland is represented as of 1949.

Reported by firms customarily employing 15 persons or more. Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period of the preceding month.

\*Average weekly wages and salaries.

<sup>(1)</sup>As of January 1954 and January 1955, a number of distributors not previously reporting were added to the survey.

<sup>(2)</sup>Includes gas used for house heating.

<sup>(3)</sup>Barrels of 35 Imperial gallons.

<sup>(4)</sup>Increase in natural gas sales and decrease in manufactured gas sales caused by transfer of large company from manufacture to natural gas.

\*Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments for the industry from the Annual Census of Industry Survey.

<sup>(1)</sup>Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953. <sup>(2)</sup>Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint. <sup>(1)</sup>Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. <sup>(2)</sup>Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. <sup>(3)</sup>Mill shipments destined for export.

\*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample are lying outside these municipalities are also chosen for complete enumeration.

<sup>(1)</sup>The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

<sup>(2)</sup>As of January, 1950, Newfoundland is included.

<sup>(1)</sup>Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.<sup>(2)</sup>Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.<sup>(3)</sup>Annual data are monthly averages of crop year.<sup>(4)</sup>Includes eggs for hatching.

Beginning with April, 1950, Newfoundland is included.

<sup>(1)</sup> In the upper section of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over.<sup>(2)</sup> Operating income equals operating revenues less operating expenses adjusted for tax accruals and net of equipment and joint facilities.

<sup>(1)</sup>Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the month.

<sup>(2)</sup>From July, 1954, the figures are not adjusted for items in transit.

<sup>(3)</sup>Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent.

<sup>(4)</sup>Mainly deposits of foreign banks.

<sup>(5)</sup>Including issues payable in foreign currency.

<sup>(6)</sup>Excluding Canadian day-to-day loans.

<sup>(7)</sup>Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. \*Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On a comparable basis, the Canada total in August, 1955 was 12% above that of August, 1954. Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada including government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

(3) Includes, in addition to the industries listed, Tobacco.

ubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(4) Includes Printing and Publishing and Allied Industries.

(4) For 1953 and 1954, these totals do not equal the sum of the totals for the individual groups. It is estimated that total profits before taxes may exceed the sum of the groups by about \$11,000,000 per quarter in 1953 and \$14,000,000 per quarter in 1954. Although the totals have been adjusted by these amounts it is not possible to allocate the differences to the individual groups.

\*Assignments made under the Bankruptcy and Winding-Up Acts. <sup>(1)</sup>Quarterly data for the last five columns are monthly averages. <sup>(2)</sup>In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.

Note.— Until the end of 1954, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1954 have been revised accordingly. Monthly figures for 1955 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

<sup>(1)</sup> Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952. <sup>(2)</sup> Exclusive of stillbirths. <sup>(3)</sup> Not applicable to figures for population and immigration. <sup>(4)</sup> Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951. <sup>(5)</sup> Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

<sup>(1)</sup>Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

<sup>(2)</sup>This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

Note: Newfoundland is represented as of 1949.

Reported by firms customarily employing 15 persons or more.

\*Average weekly wages and salaries.

Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period

or the preceding month. Source: Employment and Payrolls, D.B.S.

<sup>(1)</sup>Excludes gold. <sup>(2)</sup>Arithmetically converted from 1935-39=100. <sup>(3)</sup>Excluding Newfoundland. The prices of western grains prior to August, 1954, are final prices whereas those used since are initial prices for wheat and initial prices plus interim payments for oats and barley. <sup>(1)</sup>As of January 1954 and January 1955, a number of distributors not previously reporting were added to the survey.

<sup>(2)</sup>Includes gas used for house heating.

<sup>(3)</sup>Barrels of 35 Imperial gallons.

<sup>(4)</sup>Increase in natural gas sales and decrease in manufactured gas sales caused by transfer of large company from manufactured to natural gas.

Note: In view of the change, in March 1955, in the method of reporting certain categories of refining operations, the classification of the table was altered so that continuity of the series could be maintained as much as possible. <sup>(1)</sup>Prior to March, 1955 excludes a certain amount of imported fuels.

\*Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments universe for the industry from the Annual Census of Industry Survey.

<sup>(1)</sup> Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of all manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953. <sup>(2)</sup> Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as result of activity during the same month (and also be reported as shipments in the month received); or whether they will be added to existing backlogs.

Source: Monthly Report of Inventories, Shipments and Orders in Manufacturing Industries, and Quarterly Report on Estimated Value of Manufacturers Shipments, D.B.S.

Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint.  
include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.  
which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

Source: Production, Shipments and Stocks on Hand of Sawmills, D.B.S.

Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.

<sup>(1)</sup>Monthly totals are not equivalent to annual data which

<sup>(2)</sup>Total pulp production covers "screenings"

<sup>(3)</sup>Mill shipments destined for export.

\*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

<sup>(1)</sup>The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits at a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

<sup>(2)</sup>As of January, 1950, Newfoundland is included.

<sup>(1)</sup>Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.

<sup>(2)</sup>Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.

<sup>(3)</sup>Annual data are monthly averages of crop year.

<sup>(4)</sup>Includes eggs for hatching.

<sup>(1)</sup>Estimates of charge accounts and instalment receivables outstanding on the books of retail dealers include Newfoundland from 1951. In the case of other items, Newfoundland estimates have been included, as available, commencing June 30, 1949. <sup>(2)</sup>Charge accounts receivable outstanding on the books of retail dealers. Newfoundland included from 1951. <sup>(3)</sup>Instalment receivables outstanding on the books of retail dealers. Newfoundland included from 1951. <sup>(4)</sup>Instalment paper held by sales finance and acceptance companies in connection with the financing of retail purchases of consumer goods, largely new and used automobiles. <sup>(5)</sup>Includes estimated personal loans by chartered banks, small loan companies, licensed money lenders and credit unions.

(1) The trade figures have been adjusted to conform to balance of payments definitions of the international exchange of commodities. (2) Balance also reflects all other current transactions. (3) Net sales (+) or purchases (-) by Canadians of Canadian and foreign securities (trading, new issues and retirements.)

Beginning with April, 1950, Newfoundland is included.

<sup>(1)</sup>In the upper section of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over.

<sup>(2)</sup>Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities. Source: Operating Revenues, Expenses and Statistics, Railways in Canada, D.B.S.

<sup>(1)</sup> Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month.

<sup>(2)</sup> From July, 1954, the figures are not adjusted for items in transit.

<sup>(3)</sup> Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent.

<sup>(4)</sup> Mainly deposits of foreign banks.

<sup>(5)</sup> Including issues payable in foreign currency.

<sup>(6)</sup> Excluding Canadian day-to-day loans. <sup>(7)</sup> Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,759.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. \*Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On a comparable basis, the Canada total in September, 1955 was 18% above that of September, 1954. Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada excluding government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.  
Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(2) Includes, in addition to the industries listed, Tobacco.  
(3) Includes Printing and Publishing and Allied Industries.

INCREASED MARKEDLY IN 1955**

(At Seasonally Adjusted Annual Rates)  
(BILLIONS OF DOLLARS)

## Gross National Product Continued Record Pace in Third Quarter

Gross national product, seasonally adjusted, rose to \$26.9 billion in the third quarter of 1955, marking the fourth successive advance in output since the mild contraction from mid-1953 to mid-1954. The gain in output in the third quarter was more moderate than that which occurred between the first and second quarters of this year, amounting to about 2% compared with an increase of more than 4% in the preceding quarter. The successive advances in output since a year ago have amounted to \$2.9 billion at annual rates, and have brought the general level of economic activity to a point about 12% above the 1954 third quarter rate of \$23.9 billion.

A number of expansionary factors have contributed to this \$2.9 billion growth in output over the course of the past year. The larger grain crop in 1955 is reflected in the increase, accounting for about \$300 million of the gain in total gross national product. Personal expenditure on consumer goods and services has led the advance in final purchases, with a gain of \$1.2 billion, while exports, gross domestic investment in durable assets, and government expenditures have together absorbed an additional \$1.7 billion of output. Finally, the swing in business inventories from liquidation a year ago to net accumulation in the third quarter of 1955 has amounted to \$0.5 billion. Under these stimuli, Canadian production has pushed rapidly forward, although a considerable part of both final and inventory demand has been channelled into imports, which have risen by more than \$0.9 billion (at seasonally adjusted annual rates) over the past year.

With the crop out-turn now known and data covering three quarters of the year's activity in the non-farm sector available, it is possible to suggest some order of magnitude for the year 1955 as a whole. On the basis of present evidence, it seems likely that gross national product in 1955 will be about 9% higher than last year's figure of \$24.0 billion. With final product prices on average relatively stable in the first nine months of this year, this gain of 9% would reflect, for the most part, an increase in the physical volume of output. It will be recalled that in 1954 the volume of output declined

by 3% while some increases in the labour force and productive capacity were taking place. This made possible the very sharp increase in the volume of output which is indicated for 1955. The increase over 1953 is of the order of 5%.

The expansion in non-farm output between the second and third quarters appears to have occurred mainly in non-manufacturing activity, in contrast to preceding quarters where manufacturing accounted for about half of the total rise in output; durable goods production was responsible for most of the relatively modest gain in manufacturing activity in the third quarter. Outside the manufacturing field, industrial gains were widespread, with all major groups showing gains over the second quarter. Rising export demand for mine and metal products was accompanied by a sharp increase in the output of the mining industry; forestry production also rose as exports of wood and wood products were sustained at a high level. The recent up-turn in non-residential construction together with a continuation of the high level of activity in the residential field contributed to a further gain in output in the construction industry. Gains were also registered in transportation and in most of the other service sectors. It may be noted that since mid-1954, substantial increases have occurred in almost all of the manufacturing sub-groups which were affected by the earlier contraction in activity, including iron and steel products, electrical apparatus and supplies, transportation equipment, and textiles.

Accompanying these developments on the production side, the total number of persons with jobs in the third quarter was about 4% higher than in the same period of 1954. In the non-agricultural sector, the number of persons with jobs rose by 6%. At the same time, average hours worked per week in manufacturing were somewhat higher than a year ago. The number of persons without jobs and seeking work in Canada in the third quarter was almost 20% below the level of last year's third quarter.

Prices on the average have been relatively stable over the course of the past year. Prices

of non-agricultural primary materials have begun to edge upward, while agricultural prices have continued to decline. In particular, prices of non-grain export products and construction

materials have shown some increases. The wholesale price index in the third quarter was about  $1\frac{1}{2}\%$  above the same period of a year ago, while the consumer price index was relatively unchanged.

### *Summary of Developments in Income and Expenditure*

Both personal and business incomes continued to expand between the second and third quarters, reflecting for the most part further gains in wages and salaries and in investment income including corporation profits. The successive quarter-to-quarter gains in these two important income categories have accounted for the greater part of the enlarged flow of income over the course of the past year. Thus, the most recent gains have brought wages and salaries to a point approximately 8% above last year's third quarter, while investment income is running

at a rate approximately 25% above a year ago. At the same time, account must be taken of the important increase in net income of farm operators in 1955 resulting from the substantially higher level of crop production compared with last year. The table below shows percentage increases for a number of selected income aggregates in the first nine months of 1955.

Accompanying these income gains, impressive increases have occurred in almost all segments of gross national expenditure in the

first nine months of this year relative to the same period of 1954. Especially noteworthy in the last two quarters have been the firming of business investment outlays for new construction, and machinery and equipment, which had been relatively stable since the declines of late 1953 and early 1954. In the third quarter of this year, these investment categories accounted for about \$0.3 billion of the \$1.1 billion increase in final purchases over the second quarter; the growth in consumer outlays and in exports accounted for almost all of the remain-

ing increase, as shown in the table below. These developments between the second and third quarter were accompanied by one of the sharpest advances in imports of goods and services since the period immediately following the out-break of the Korean war.

The following table provides a summary review of changes in the categories of gross national expenditure from the second to the third quarter, and in the first nine months of 1955 relative to a year ago.

Note.—Until the end of 1954, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1954 have been revised accordingly. Monthly figures for 1955 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

<sup>(1)</sup>Not applicable to figures on population and immigration.

<sup>(2)</sup>Yukon and North-West Territories not included in figures for births, marriages and deaths.

<sup>(3)</sup>Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952.

<sup>(4)</sup>Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

Source: Monthly Report of Vital Statistics, D.B.S. and Department of Citizenship and Immigration.

<sup>(1)</sup>Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

<sup>(2)</sup>This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

\*Since the revision of the Unemployment Insurance Act, effective October 2, 1955, no distinction is made between short-time, temporary layoff and ordinary claimants. Prior to October, data relate to ordinary claimants only.

\*\*Under the new Act, benefit payments are made on the basis of weeks instead of days. Number of days benefit paid in respect of unemployment prior to October 2, 1955 will continue to be shown until these payments on the old daily basis are gradually exhausted.

Note.—<sup>(1)</sup>On last working day of month. <sup>(2)</sup>Unless regular benefit only is specified, figures contain supplementary benefit from January 1 to April 15 each year (in 1952 to March 31). <sup>(3)</sup>Prior to February 1955, estimate based on number of payments in week containing last working day of month; since that date estimate based on weekly average of number of payments. <sup>(4)</sup>Revised to relate to the Thursday nearest to the last day of the month.

<sup>(1)</sup>Excludes gold. <sup>(2)</sup>Arithmetically converted from 1935-39=100. <sup>(3)</sup>Excluding Newfoundland. The prices of western grains prior to August, 1954, are final prices whereas those used since are initial prices for wheat and initial prices plus interim payments for oats and barley. <sup>(1)</sup>As of January 1954 and January 1955, a number of distributors not previously reporting were added to the survey.

<sup>(2)</sup>Includes gas used for house heating.

<sup>(3)</sup>Barrels of 35 Imperial gallons.

<sup>(4)</sup>Increase in natural gas sales and decrease in manufactured gas sales caused by transfer of large company from manufactured to natural gas.

Note: In view of the change, in March 1955, in the method of reporting certain categories of refining operations, the classification of the table was altered so that continuity of the series could be maintained as much as possible. <sup>(1)</sup>Prior to March, 1955 excludes a certain amount of imported fuels.

\*Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments universe for the industry from the Annual Census of Industry Survey.

<sup>(1)</sup>Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of all manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953. <sup>(2)</sup> Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint. <sup>(1)</sup>Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. <sup>(2)</sup>Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. <sup>(3)</sup>Mill shipments destined for export.

<sup>(1)</sup>Includes some silvery pig iron formerly included with ferro-alloys. <sup>(2)</sup>Excluding producers' interchange.  
all other shapes, wire and wire rope. Beginning January 1954, imports exclude castings, forgings, fittings and couplings.

<sup>(3)</sup>Imports include, in addition to <sup>(4)</sup>Monthly average.

\*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

<sup>(1)</sup>The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits and a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

<sup>(2)</sup>As of January, 1950, Newfoundland is included.

<sup>(1)</sup>Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.<sup>(2)</sup>Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.<sup>(3)</sup>Annual data are monthly averages of crop year. <sup>(4)</sup>Includes eggs for hatching.

Beginning with April, 1950, Newfoundland is included.

<sup>(1)</sup>In the upper section of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over.<sup>(2)</sup>Operating income equals operating revenues less operating expenses adjusted for tax accruals and cost of equipment and joint facilities.

<sup>(1)</sup>Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. <sup>(2)</sup>From July, 1954, the figures are not adjusted for items in transit. <sup>(3)</sup>Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent. <sup>(4)</sup>Mainly deposits of foreign banks. <sup>(5)</sup>Including issues payable in foreign currency.

<sup>(6)</sup>Excluding Canadian day-to-day loans. <sup>(7)</sup>Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789. Source: Statistical Summary of Bank of Canada.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and union bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. \*Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business.

a comparable basis, the Canada total in October, 1955 was 17% above that of October, 1954.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada including government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction, Lumber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(3) Includes, in addition to the industries listed, Tobacco.  
(4) Includes Printing and Publishing and Allied Industries.

## FOREWORD

This is the second volume in the series of biennial supplements to the *Canadian Statistical Review*. The present report supersedes the first issue which was published in December, 1953.

These supplements were initiated in response to demands from businessmen, economists and statisticians for a readily available and continuous record of current economic indicators. They contain three important features: first, they present in the form of monthly averages, from 1926 or the earliest year for which data are available, to the last complete year, the annual record of the 1,600 statistical series carried in the regular monthly issues of the "Canadian Statistical Review". This permits users of the statistics to locate historical figures without endless thumbing through back issues or maintaining extensive records. Secondly, except in certain specified cases, the annual and monthly data are comparable throughout the period covered, and incorporate all revisions which have been made since the publication of the 1953 supplement. Thirdly, these reference volumes provide monthly data for a longer period than can be shown in the monthly bulletins, thereby permitting more extensive analysis of seasonal trends.

The 1955 supplement presents, for most series, monthly or quarterly data from January 1952 through December 1954 or for a longer period where more space was available as a result of the lack of historical figures. Since the publication of the first supplement, both monthly and annual data have been revised in several cases, so that, in the case of monthly and quarterly data, the figures for 1950 and 1951 as shown in the 1953 volume are not always strictly comparable with those for later years contained in the present report. An examination of the statistics for 1952, shown in both publications, will reveal the extent of changes for those series which have been altered during the past two years. The annual data are comparable throughout except where specifically noted.

Designed to be used in conjunction with the latest monthly issue of the "Canadian Statistical Review", this volume presents the record of the more important economic indicators from 1926 to date. Through the means of weekly supplements, subscribers are assured of receiving most of the current figures as soon as they are forthcoming. These supplements are supplied without charge to regular subscribers to the "Canadian Statistical Review".

The present volume was prepared by the Business Statistics Section of the Research and Development Division of the Bureau.

## EXPLANATORY NOTES AND SOURCES

## INTRODUCTION

Table 1

1. Seasonally adjusted at annual rates.
2. Inventories include manufacturers' own investment only.
3. Rough cords of 128 cu. ft.
4. End of period.
5. Before 1945, relates to week in month of highest employment.

Table 2

1. "De facto" population. Annual data are for June. Between 1940 and 1950 estimates refer to the total population including members of the forces serving overseas and merchant seamen at sea. From 1951 to 1954, the mid-year estimates on this basis were, respectively, 50,557, 50,722, 50,857 and 51,066.
2. Annual data are for June. Prior to 1948, estimates excluded private indoor domestic servants and gainfully occupied persons over pensionable age (men, 65; women, 60). Part-time women workers were counted as half units. The civil employment estimate for 1948 on the old basis was 19,064 and the estimate of unemployed was 272.
3. At current market prices. Annual data are totals for the year; for 1952, 1953 and 1954 they are the sum of the four quarters. Prior to 1946, data are unrevised and not strictly comparable to those of later years.
4. Annual data for 1948 and 1949 are for June.
5. As of 1952, data take account of the increased valuation of parcel post.
6. Output of building and civil engineering work, excluding the output of building operatives employed by private firms outside the building and civil engineering industries. Includes building by operatives employed by public authorities.

Sources: Monthly Digest of Statistics and Annual Abstract of Statistics, Central Statistical Office, London.

Table 3

1. Including Armed Forces Overseas. Prior to 1941, annual figures are mid-year estimates; thereafter they are monthly averages.
2. Includes wage and salary disbursements and other labour income. Excludes employer contributions for social insurance.
3. Includes shipments under the Mutual Security Program. Beginning with 1941, data include lend-lease exports. From 1947 onward army civilian supply shipments are included.
4. Annual figures are averages of the unadjusted data.
5. At book value. Annual data are the unadjusted December figures for each year.
6. Revised series beginning in 1948; not completely comparable with earlier years.
7. Production and related workers who worked during or received pay for the pay period ending nearest the 15th of the month. Covers both full-time and part-time employees.
8. Data for 1939 and later years are not strictly comparable with earlier years.
9. Data for 1951 and subsequent years not comparable with those of earlier years. In 1951, the monthly average on the old basis was 12,748.
10. As at Wednesday, nearest end of month. Coverage increased in 1952.
11. Standard and Poor's Corporation.

Sources: Monthly Survey of Current Business and Biennial Supplement to the Survey of Current Business, U.S. Department of Commerce.

Table 4

Note. For the period 1926-1943 data for births and deaths are by place of occurrence; since 1944 the data are by place of

Table 4—Continued.

residence. Monthly data are by month of occurrence. Marriages are classified by place of occurrence throughout.

1. Annual and monthly data for population, births, marriages and deaths include the Yukon and North West Territories. Although Newfoundland data on population, births, marriages and deaths are shown separately for the entire period, they are included in the Canada totals only since 1949.
2. Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952.
3. Exclusive of stillbirths. Annual data are monthly averages.
4. Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.
5. Annual data are monthly averages.

Sources: Monthly Report of Vital Statistics, D.B.S., Annual Report of Vital Statistics, D.B.S., Department of Citizenship and Immigration.

Table 5

Note. Throughout this table, Newfoundland is included as of 1949. In 1948, the last year before accession, Newfoundland's Gross National Product was about \$175 million.

1. Accrued Net Income of Farm Operators from Farm Production. This item includes the undistributed earnings of the Canadian Co-operative Wheat Producers and the Canadian Wheat Board and an inventory valuation adjustment for grain in these channels, on a calendar year basis. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and, since 1951, a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.
2. Net Income of Non-Farm Unincorporated Business. This item includes net income of independent professional practitioners.
3. Includes outlay on new durable assets such as building and highway construction by governments other than government business enterprises. Also includes U.N.R.R.A., Mutual Aid and Military Relief, and the change in inventories of government commodity agencies.
4. Includes capital expenditures by private and government business enterprises, private non-commercial institutions, and outlays on new residential construction by individuals.
5. Excludes U.N.R.R.A., Mutual Aid and Military Relief.
6. Beginning in 1950, columns will not cross-add due to the omission of an adjusting entry arising from the mechanical conversion of constant dollar data from a 1949 base to a 1935-39 base.
7. This item differs from Column 4 on pages 16 and 18 in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Co-operative Wheat Producers and the Canadian Wheat Board.
8. Includes all government debt interest paid to persons.
9. Includes net expenditure abroad.

Table 6

Sources: D.B.S. Reference Paper No. 34 "Revised Index of Industrial Production, 1935-51" and Business Statistics Section, D.B.S.

## LABOUR

Table 7

Note. These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error. Data include Newfoundland in estimates from October, 1949, and exclude residents of the Yukon and the North-West Territories and Indians on reservations. Prior to 1948 estimates are given by years as of June 1. From 1946 to 1952, annual figures are averages of quarterly surveys. For 1953 and 1954 annual figures are averages of monthly surveys.

1. The average for 1949 excludes Newfoundland.
2. Due to flood conditions, estimates for Manitoba for June, 1950, were based on previous experience rather than direct survey.

Sources: D.B.S. Reference Paper No. 58 "Labour Force Estimates" and "Canadian Labour Force Estimates, 1931-1950", D.B.S.

Table 8

Note. As of 1949, Newfoundland is included.

1. Includes retroactive wage payments to railway employees.

Source: "Monthly Estimates of Canadian Labour Income", D.B.S.

Tables 9-11

Note. Data reported by firms customarily employing 15 persons or more. Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period of the preceding month.

\* Average weekly wages and salaries. Newfoundland is represented as of 1949.

1. Includes wood products, iron and steel products, transportation equipment, non-ferrous metal products, electrical apparatus and supplies, and non-metallic mineral products.
2. Includes foods and beverages, tobacco and tobacco products, rubber products, leather products, textile products except clothing, clothing, paper products, printing, publishing and allied industries, products of petroleum and coal, chemical products and miscellaneous manufacturing industries.

Source: "Employment and Payrolls", D.B.S., and Employment Section, D.B.S.

Tables 12 and 13

Note. Data are for hourly rated wage earners of firms customarily employing 15 persons or more. Statistics throughout Tables 12 and 13 are compiled from data which relate to the last pay period of the preceding month. Newfoundland is represented as of 1949.

## LABOUR — Concluded

## Tables 12 and 13 — Concluded

1. See note 1, Table 9.
2. See note 2, Table 9.

Source: "Man-Hours and Hourly Earnings", D.B.S.

## Table 14

Note. Newfoundland is represented as of 1949.

Source: "Employment and Payrolls", D.B.S.

## Table 15

Note. Newfoundland data are included as of April 1949.

1. On last working day of month.
2. Unless regular benefit only is specified, figures contain supple-

## Table 15 — Concluded

mentary benefit from January 1 to April 15 each year, (in 1952 to March 31).

3. Since 1952, revised to relate to the Thursday nearest to the last day of the month.
4. Prior to 1952, data include deferred as well as current vacancies.

Sources: Monthly Reports: "Statistical Report on the Operation of the Unemployment Insurance Act"; "Summary Report on Placement Operations of Local Employment Offices", D.B.S. and Labour Gazette (Department of Labour).

## Table 16

Source: Monthly Report: Labour Gazette, Department of Labour.

## PRICES

## Table 17

1. This Index is available for January, April and August only.

Sources: "Prices and Price Indexes" and "Price Index Numbers of Commodities and Services Used by Farmers", D.B.S.

## Table 18

1. Changed from silk fabrics to rayon fabrics in January, 1942.
2. From 1926 to 1941 rayon yarns and artificial silk hosiery.
3. Gold is included from 1935.
4. Gasoline tax excluded from 1941 to 1946.

Source: "Prices and Price Indexes", D.B.S.

## Table 19

1. Excludes gold.
2. Index arithmetically converted from base 1935-1939 = 100.
3. Excluding Newfoundland. The prices of western grains prior to August, 1954 are final prices whereas those used since are initial prices for wheat and initial prices plus interim payments for oats and barley.

Sources: "Prices and Price Indexes"; "Index Numbers of Farm Prices of Agricultural Products"; "Non-Residential Building Materials Price Index, 1935-1952" and "Price Index Numbers of Residential Building Materials 1926-1948", D.B.S.

## FUEL AND POWER

## Table 20

Note. Newfoundland is included as of 1949.

Monthly totals are not equivalent to annual data for several reasons. First, for purposes of the annual surveys, results of which are published in the "Central Electric Stations" annual reports, generating stations are allowed to file returns for their fiscal years which are not calendar years in all cases. The annual series, however, are comparable for the period covered. Secondly, the monthly surveys do not include statistics for the smaller stations and do not cover output in the Yukon and North-West Territories. The annual series cover all stations generating power for sale. Thirdly, the annual surveys exclude all power generated for own use by reporting establishments. For long-term comparability, the monthly series retain the West Kootenay plants which were dropped from the annual survey in 1947. The entire output of these plants was taken over by the Consolidated Mining and Smelting Co. and is reported annually under the Non-Ferrous Metal Smelting and Refining Industry.

The annual surveys do not provide data on primary and secondary power. Secondary production in the annual section of the table is taken from the monthly surveys, while primary production is a residual figure obtained by deducting the secondary production figure from the annual output total.

Sources: Monthly Report: "Central Electric Stations"; Annual Report: "Central Electric Stations", D.B.S.

## Table 22

1. As of January, 1954, 8 minor distributors were added to the survey after amalgamation under one distributing agency.
2. Beginning with 1952, excludes miscellaneous gas.
3. Includes gas used for house heating.
4. Barrels of 35 imperial gallons.

Sources: Monthly Reports: "Crude Petroleum, Natural Gas and Manufactured Gas"; "Trade of Canada", D.B.S. Annual Report: "Crude Petroleum and Natural Gas Industry", D.B.S.

## Table 23

1. Prior to 1940 data refer to products made for sale.
2. For some years prior to 1940 includes a small amount of aviation gasoline.
3. Prior to 1937, series represents production for sale of all fuel oils including stove oil. Beginning with 1937, stove oil is excluded. In 1937, the monthly average (including stove oil) comparable to previous years, was 1,165 thousand barrels.
4. Prior to 1940 series used represent apparent domestic consumption. Data were computed from production, imports, exports and stocks at refineries. Since 1940, data exclude a certain amount of imported fuels.
5. Prior to 1946, fuel oil data include stove oil; stove oil is excluded since 1946. Apparent sales of light fuel oils including stove oil in 1946 (comparable to previous years) is estimated at 1,045 thousand barrels.
6. Prior to 1946 series includes stove oil. In 1946, stocks of light fuel oils including stove oil are estimated at 3,198 thousand barrels.

Sources: Monthly Report: "Refined Petroleum Products", D.B.S. Annual Reports: "Refined Petroleum Products" and the "Petroleum Products Industry", D.B.S.

## Table 21

1. As of April, 1949, Newfoundland data are included.
2. Annual computation to 1953 entails considerable adjustments in production and external trade as described on page 19 of the Coal Mining Report for 1953.

Sources: Monthly Report: "Coal and Coke Statistics" and Annual Report: "The Coal Mining Industry", D.B.S.

## MINING

## Table 24

Note. Newfoundland is included in production figures as of 1949.

1. Includes fine copper in ore, ingots, bars, billets, rods, strips, sheets and tubing.
2. Includes ingots, bars and billets.
3. Includes nickel in matte or speiss, oxide and fine.
4. Includes lead in ore and in pigs.

Sources: Monthly Reports: "Silver, Lead and Zinc"; "Gold"; "Copper and Nickel"; "Canada's Leading Minerals" and "Trade of Canada", D.B.S. Annual Reports: "The Silver-Lead Zinc Mining Industry"; "The Nickel-Copper Mining, Smelting and Refining Industry"; "The Gold Mining Industry"; "The Miscellaneous Metal Mining Industry", D.B.S.

## Table 25

1. Prior to 1948 contains a minor quantity used by plants reporting.
2. Total salt and salt content of brine.

Sources: Monthly Reports: "Production of Canada's Leading Minerals"; "Cement and Cement Products"; "Trade of Canada", D.B.S. Annual Report: "General Review of the Mining Industry", D.B.S. Separate annual reports for asbestos, gypsum, feldspar, cement, salt and lime, D.B.S.

## MANUFACTURING

Table 26

1. As at end of period.
2. Total inventories held including manufacturers' own investment and that portion not owned by reporting firms but financed by progress payments.
3. Inventories represent manufacturers' own investment only. Shipments represent all shipments from the plant, whether for sale or for transfer to other units of the same firm, and include all progress payments received during the period.
4. Includes primary iron and steel, iron castings, sheet metal products and wire and wire products.
5. Includes heavy electrical machinery, office, household and store machinery and industrial machinery.
6. Excludes heavy electrical machinery.
7. Prior to 1952, data represent "gross value of products". Annual data for 1952 and subsequent years represent shipments except for certain industries which are still represented by gross value of products. It is for this reason that the quarterly data are not quite comparable with the annual figures; the quarterly series represent shipments in all cases. The quarterly estimates are based on the values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments universe for the industry from the Annual Census of Industry Survey.
8. Estimated total unfilled orders on books at end of period, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of all manufacturing firms with a production value of over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953.

9. Total New Orders received during the period at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Annual data for 1952 are averages of 11 months; January data were not available.

Sources: Reference Paper No. 53, "Inventories and Shipments in Manufacturing Industries, 1949-51", D.B.S.; Monthly Report: "Inventories, Shipments and Orders in Manufacturing Industries", D.B.S.; Quarterly Report: "Estimated Value of Manufacturers' Shipments", D.B.S.; Annual Report: "General Review of the Manufacturing Industries of Canada", D.B.S.

Table 27

1. Releases of domestically manufactured tobacco for consumption in Canada.
2. End of period.
3. The production of beer is shown in thousand barrels of 25 gallons each. Commencing with April 1949, Newfoundland is included.
4. Includes bottling of imported liquors.

Sources: Department of National Revenue and Quarterly Report: "Stocks and Consumption of Unmanufactured Tobacco", D.B.S.

Table 28

1. Includes crude rubber, Gutta-percha unmanufactured, Latex and Balata crude.
2. Excludes bicycle tires.
3. Includes small number of imported tires in monthly data and the 1954 monthly average.

Sources: Monthly Reports: "Consumption, Production and Inventories of Rubber", D.B.S. and "Trade of Canada", D.B.S.; Monthly data for tires and footwear and annual data for shipments of tires and footwear from the Rubber Association of Canada; Annual Report: "the Rubber Industry", D.B.S.

Table 29

1. As of April 1949, Newfoundland is included.
2. Newfoundland is included as of 1949. Annual data for 1952 and 1953 represent factory shipments.
3. Commencing with 1948, "Little Gents' Shoes" are included with Misses' and Children's rather than with Boys' and Youths'.

Sources: Monthly Reports: "Statistics of Hides, Skins and Leather", and "Production of Leather Footwear", D.B.S. Annual Report: "The Leather Footwear and Leather Boot and Shoe Findings Industries", D.B.S.

Table 30

1. Data include estimate for non-reporting companies.
2. Bales of 500 pounds gross weight.
3. Invoice weight.
4. Revised series. Monthly data not available prior to 1954. Data prior to 1953 represent production.

Table 30 - Continued

5. Annual data for 1953 and 1954 represent shipments.

Sources: Cotton Institute, Canadian Woollen and Knit Goods Manufacturers' Association, Silk and Rayon Institute and Report of the Royal Commission on the Textile Industry, 1938; "Trade of Canada", D.B.S.

Table 31

Note. Annual data prior to 1950 are taken from annual Census of Industry reports. From 1950, annual and quarterly data are those given in the quarterly reports of Factory Clothing.

1. Includes children's.
2. Includes boys.

Source: "Quarterly Production of Garments (selected items)" D.B.S.

Table 32

Note. Newfoundland is included as of 1949 in data for wood pulp and newsprint.

1. Monthly totals are not equivalent to annual data which include Newfoundland (since 1949) and Yukon and North-West Territories for which only annual statistics are collected.
2. Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.
3. Monthly totals are not equivalent to annual data due to differences in classification in the annual data and to the receipt of additional statistics which cannot be allocated by months.
4. Totals include unspecified pulp.
5. Mill shipments destined for export.

Sources: Monthly Reports: "Production, Shipments and Stocks on Hand of Sawmills", D.B.S. and bulletins of the Canadian Pulp and Paper Association and Newsprint Association of Canada. Annual Reports: "The Lumber Industry" and "The Pulp and Paper Industry", D.B.S.

Tables 33A and 33B

1. As of January, 1950, includes some silvery pig iron formerly included with ferro-alloys.
2. Excluding producers' interchange.
3. Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products.
4. Prior to 1946, imports include castings, forgings and rolling mill products. Since 1946 they include, in addition to all other shapes, wire and wire rope. Beginning January 1954 imports exclude castings, forgings, fittings and couplings. A substantial part of the imports appears after refinishing in total shipments. Production of primary iron and steel shapes from Canadian steel is equivalent to about 72 per cent of the total production of ingots.
5. Monthly average.

Sources: Monthly Report: "Primary Iron and Steel", D.B.S., and Annual Report: "The Primary Iron and Steel Industry".

Table 34

1. Annual and monthly data after March 1952 are production plus imports less re-exports. Prior to March 1952, monthly data represent shipments plus imports less re-exports.
2. As of April 1949, Newfoundland is included.

Sources: Monthly Reports: "Motor Vehicle Shipments", "New Motor Vehicle Sales and Motor Vehicle Financing", "Trade of Canada", D.B.S. Annual Report: "The Motor Vehicles Industry", D.B.S.

Table 35A

1. Electric and other.
2. Gas types are included as of January 1952.
3. Annual figures for 1952 and 1953 do not agree with monthly data due to additional information which cannot be allocated by months.
4. End of period.
5. Prior to 1952 annual data include apartment-type machines. Monthly data do not include these machines.

Sources: Monthly Reports: "Domestic Electric Refrigerators", "Domestic Washing Machines" and "Trade of Canada", D.B.S. Annual Report: "The Electrical Apparatus and Supplies Industry", D.B.S.

Table 35B

1. Annual data for 1952 and monthly data for 1952 and 1953 were estimated by adjusting factory shipments for changes in stocks.
2. Includes television sets in recent years.
3. Imports from U.S. only.
4. Adjusted for change in method of reporting inventories by one firm.

Sources: Monthly Report: "Radio and Television Receiving Sets", D.B.S. Annual Report: "The Electrical Apparatus and Supplies Industry", D.B.S.

## CONSTRUCTION

Table 36

## \* Construction of dwelling units.

Note. These data are the result of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. The remainder of the country is covered on a sample basis.

Beginning with January, 1952, the 100 per cent coverage by the Central Mortgage and Housing Corporation was extended to those urban centres which had reached populations of 5,000 or more according to the 1951 Census. In addition, the boundaries of the Metropolitan Areas have been altered to agree with the 1951 Census Metropolitan Areas.

Source: Monthly Report: "New Residential Construction", D.B.S.

Table 37

1. Generally, the municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December 1946. The data down to 1949 represent building permits within the actual limits of these cities. Data for subsequent years, and monthly data, cover approximately the metropolitan areas of the selected cities according to the 1951 decennial census definitions. For the year 1949 both sets of data are given to maintain comparability.
2. The coverage was extended to 507 municipalities in 1948 and as of 1955 stands at 821, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.
3. As of January 1950, Newfoundland is included.

Source: General Assignments Division, D.B.S.

Table 38

1. Monthly figures are not equivalent to annual data due to receipt of additional or more comprehensive statistics which cannot be allocated by months.
2. Newfoundland included as of 1949 for clay products, as of 1950 for iron and steel products and as of 1952 for gypsum products.
3. Includes shingle-type siding.
4. Hollow blocks including fireproofing and load-bearing tiles.
5. See Note 1, Table 32.
6. Includes planks and boards, flooring and square timber.
7. Prior to 1944 data represent factory sales.
8. Monthly data for concrete brick and blocks and monthly and annual data for cement pipe and tile, cover production of firms which normally account for 75 to 80 per cent of total Canadian Production of cement products.
9. Prior to 1946, annual data represent hardwall plaster only, while later figures include other gypsum plasters. Average monthly production of hardwall plaster only in 1947, (comparable to previous years) was 10.0 thousand tons.
10. Monthly data represent sales of firms which normally account for 96 per cent of total for Canada.
11. Annual data prior to 1952 represent value of production.
12. Since 1948 includes concrete chimney blocks.
13. Annual figures for concrete brick and concrete blocks for 1952 1953 are factory shipments.
14. For building insulation only.
15. Annual data for 1952 and 1953 represent factory shipments.

Sources: Monthly Reports: Rigid Insulating Board; Asphalt Roofing; Production, Shipments and Stocks on Hand of Sawmills; Iron Castings and Cast Iron Pipes and Fittings; Steel Wire and Specified Wire Products; Products made from Canadian Clays; Gypsum Products; Mineral Wool; Cement and Cement Products; Sales of Paints, Varnishes and Lacquers; Trade of Canada, D.B.S. Annual Reports: The Roofing Paper Industry; The Lumber Industry; The Iron Castings Industry; The Clay and Clay Products Industry; The Gypsum Industry; The Concrete Products Industry; The Paints, Varnishes and Lacquers Industry; The Wire and Wire Goods Industry; D.B.S.

## FOOD AND AGRICULTURE

Table 39

1. Harvested acreage.

Sources: "Field Crops of Canada" and "Handbook of Agricultural Statistics", D.B.S.

Table 40

1. Does not include Supplementary Government Payments made under Prairie Farm Assistance Act, Prairie Farm Income Act and Wheat Acreage Reduction Act.
2. Includes barley and barley participation payments, rye, flax, flax adjustment payments, corn, clover and grass seed, hay and clover.
3. Includes in addition sugar beets and fibre flax.
4. Includes wool, honey, maple products and miscellaneous farm products.

Source: Quarterly Report: "Farm Cash Income", D.B.S.

Table 41

1. Includes imports of wheat and wheat flour in terms of wheat.
2. Figures of customs exports from 1945-46 to date are adjusted to reflect actual physical movements from Canada. Prior to 1945-46, adjusted figures are not available.
3. Prior to 1936-37, Canadian customs figures are used. From 1936-37 to date, exports consist of overseas clearances plus U.S. imports for consumption.
4. Includes imports of oats and oatmeal and rolled oats in terms of oats.
5. Includes customs exports of oatmeal and rolled oats in terms of oats.
6. Includes imports of barley, and malt in terms of barley.
7. Includes customs exports of malt in terms of barley.

Source: "Grain Trade of Canada", D.B.S.

Tables 42A and 42B

1. Includes advance equalization payment on barley until March 1947, and subsidy on hogs from 1944 to date.
2. Based on price for hogs, including Dominion premium. A rise in ratio favours production of beef.
3. Prior to 1941, prices were quoted on a live weight basis.
4. Prior to August 1939, Barley No. 1 feed was designated as Barley No. 3, C.W.

Sources: Weekly Report: Live Stock and Meat Trade, Department of Agriculture. Monthly Reports: "Prices and Price Indexes", "Price Index Numbers of Commodities and Services Used by Farmers", "Cold Storage Holdings", D.B.S. Quarterly Report: "Coarse Grains Quarterly", D.B.S.

Table 42C

1. Annual data are monthly averages for crop years ending July 31.
2. Canadian Customs export data prior to crop year beginning August 1, 1936; subsequently, overseas clearances plus U.S. imports for domestic use. The latter are based on U.S. customs data prior to crop year beginning August 1, 1949; subsequently, they are compiled from returns of Canadian elevator licensees and shippers and advice from American grain correspondents.
3. Beginning with crop year ending July 31, 1946, customs exports are adjusted to reflect actual physical movement of wheat flour from Canada.

Sources: "Coarse Grains Quarterly", D.B.S. Monthly Reports: "Wheat Review" and "Trade of Canada", D.B.S.

Table 43

1. As at end of period.
2. Milk equivalents of cottage cheese and factory cheese other than cheddar, though not included in the monthly figures, are included in the monthly averages.
3. Includes butter and cheese imported and "In Transit".

Sources: Monthly Reports: "Dairy Factory Production"; "Dairy Review" and "Cold Storage Holdings of Dairy Products", D.B.S.

Table 44

1. Data for Newfoundland are included as of January 1953.
2. Monthly totals for 1952-1954 are not equivalent to annual data due to receipt of additional statistics which cannot be allocated by months.
3. As of April 1949 Newfoundland is included.
4. Does not include bait, offal, meal, livers, tongues or roe.
5. As of 1949, Newfoundland is included.

Sources: Monthly Reports: "Review of Canadian Fisheries Statistics" and "Trade of Canada", D.B.S. Annual Report: "Fisheries Statistics of Canada", D.B.S.

Table 45

Note. Newfoundland included as of 1949. In certain cases quarterly data are not equivalent to annual figures due to the receipt of additional statistics which have not yet been allocated by quarters.

1. Beginning August 1945, customs exports are adjusted to reflect actual physical movement of wheat flour from Canada.
2. Includes Newfoundland.
3. Includes stocks held by manufacturers, wholesalers and other warehouses.

## FOOD AND AGRICULTURE - Concluded

Table 45

4. Includes cereals.
5. Includes lima beans from 1948.
6. Includes beef stews and boiled dinners.

Table 45 - Concluded

Sources: Monthly Reports: "Grain and Lumber Statistics", "Farm Statistics", "The Sugar Situation", D.B.S. Quarterly Report on Processed Foods, D.B.S.

## DOMESTIC TRADE

Table 46

Note. Newfoundland is included as from 1949.

1. Total value of sales by retail outlets, including "Tobacco" and "All Other Trades".
2. Includes "Men's Clothing", "Family Clothing" and "Women's Clothing".

Sources: Reference Paper No. 56: "Retail Trade 1930-1951", D.B.S. Monthly Report on Retail Trade, D.B.S.

Table 47

1. Department store stocks at end of period at selling value.
2. Chain store stocks at end of period at cost value.
3. Sales and stocks by departments prior to 1951 have not been revised in accordance with the 1951 census benchmarks. Such a revision would, however, change these figures very slightly.

Sources: Annual Report: "Retail Chain Stores", D.B.S. Monthly Reports: "Department Store Sales and Stocks", and "Chain Store Sales and Stocks", D.B.S.

Table 48A

Note. From 1951 the quarterly and annual data in this table have been revised, using 1951 Census benchmarks as the computational base. The average for 1951 is given on both the revised and the unrevised footing. Annual data prior to 1951 are on the unrevised basis.

1. Accounts receivable as at end of period.

Sources: Quarterly report on Retail Consumer Credit, D.B.S.; "Retail Consumer Credit, Annual Summary 1941", "1948-1950", D.B.S.

Table 48B

1. Estimates of charge accounts and instalment receivables outstanding on the books of retail dealers include Newfoundland from 1951. In the case of other items, Newfoundland estimates have been included as available, commencing June 30, 1949.
2. Charge accounts receivable outstanding on the books of retail dealers, Newfoundland included from 1951.
3. Instalment receivables outstanding on the books of retail dealers, Newfoundland included from 1951.
4. Instalment paper held by sales finance and acceptance companies in connection with the financing of retail purchases of consumer goods, largely new and used automobiles.
5. Includes estimated personal loans by chartered banks, small loan companies, licensed money lenders and credit unions.
6. Estimates of charge accounts and instalment receivables outstanding on the books of retail dealers were revised from 1951 on the basis of data obtained from the 1951 Census, and the estimates prior to the first quarter of 1951 are not strictly comparable with data for later periods. At March 31, 1951, the figures on the old basis for charge accounts and instalment credit of retail dealers were 349 and 143 respectively.

Table 49

Note. Newfoundland not included.

Sources: "Wholesale Trade, 1949", D.B.S. Monthly Report on Wholesale Trade, D.B.S.

## EXTERNAL TRADE

Table 50

Note. Commencing with April, 1949, the Trade of Canada includes that of Newfoundland.

1. Does not include re-exports.
2. These price and volume indexes are considered reasonably accurate for the periods 1926-40 and 1946-54. They are not given for the period 1941-45 since their validity is dubious. The composition of Canada's trade was sharply different from its peacetime pattern in these years, and since no reliable price indicators could be obtained for the bulk of the war materials recorded in the trade statistics, the price indexes could not be adapted to reflect this change in the composition of trade.
3. Includes pigs, ingots, blooms and billets, castings and forgings and rolling mill products.

Source: "Trade of Canada", D.B.S.

Table 51

Note. As of April, 1949, the Trade of Canada includes that of Newfoundland.

1. These price and volume indexes are considered reasonably accurate for the periods 1926-40 and 1946-54. They are not given for the period 1941-45 since their validity is dubious. The composition of Canada's trade was sharply different from its peacetime pattern in these years, and since no reliable price indicators could be obtained for the bulk of the war materials recorded in the trade statistics, the price indexes could not be adapted to reflect this change in the composition of trade.
2. Includes pigs, ingots, blooms and billets, castings and forgings, ferro-alloys and rolling mill products.

Source: "Trade of Canada", D.B.S.

Table 52

Note. Prior to 1950, Ireland is included with Commonwealth countries, but has since been shown with European and Foreign Countries.

Table 52 - Concluded

1. Does not include re-exports.
2. Includes Burma prior to 1938 and Pakistan prior to 1948.
3. Prior to 1947 includes "other British South Africa" and Northern Rhodesia.
4. Includes Southern Rhodesia.

Source: "Trade of Canada", D.B.S.

Table 53

1. Official holdings of gold and U.S. dollars are given as of end of year or quarter.
2. The trade figures have been adjusted to conform to balance of payments definitions of the international exchange of commodities. Non-commercial items are deducted from trade statistics, as are items such as purchases by tourists which are entered elsewhere in the current account. An important adjustment during the war and again since 1950 arises from the abnormal movements of commodities on government account; payments data were substituted for the physical movement of commodities in order, among other things, to reflect more closely the proper timing and valuation of these transactions.
3. Balance also reflects all other current transactions with the exception of wartime grants and mutual aid which are included in current receipts but excluded from current payments as follows:

(million dollars)

1942 .....	1,002	1945 ....	858
1943 .....	518	1946 ....	97
1944 .....	960		

4. Net transfers for foreign direct investment in Canadian enterprises; from 1927 to 1939 also includes Canadian direct investment abroad.
5. Net sales (+) or purchases (-) by Canadians of Canadian and foreign securities (trading, new issues and retirements including official wartime repatriation).

Sources: "Quarterly Estimates of the Canadian Balance of International Payments", D.B.S. and Statistical Summary - Bank of Canada.

## TRANSPORTATION

Table 54

Note. Monthly figures are not necessarily equivalent to annual data due to the receipt of additional statistics which cannot be allocated by months.

1. Prior to 1941 statistics are for shipping years ending March 31.
2. Since 1941, data include Great Lakes shipping between United States and Canadian inland ports.
3. Annual data are averages of 9 months.
4. Includes Canadian territorial operations of foreign carriers. As from 1947, civil aviation data have been revised to include C.P.A. and T.C.A. Overseas Services, and, in the case of revenue goods ton miles, to exclude goods ton miles of charter and contract services. These data which represent unit toll traffic are therefore not strictly comparable with data for earlier years.

Sources: Transportation Section, Public Finance and Transportation Division, D.B.S. Monthly Report: "Civil Aviation". Annual Reports: "Shipping"; "Civil Aviation", D.B.S.

Table 55

Note. Based on weekly carloadings reported by major lines only. During the period covered by this table, variations in the loaded weight of cars have been considerable. Following are the average tons per loaded car-mile for each year.

1926 = 25.07	1936 = 24.73	1946 = 29.95
1927 = 25.30	1937 = 23.90	1947 = 30.23
1928 = 25.96	1938 = 25.59	1948 = 30.16

Table 55 — Concluded

1929 = 24.52	1939 = 27.28	1949 = 29.65
1930 = 24.34	1940 = 28.39	1950 = 28.91
1931 = 24.68	1941 = 29.71	1951 = 30.61
1932 = 23.57	1942 = 30.71	1952 = 31.68
1933 = 24.92	1943 = 32.75	1953 = 31.10
1934 = 24.69	1944 = 32.70	1954 = 30.60
1935 = 24.60	1945 = 32.57	

1. As of September, 1952 includes other packing house products (non-edible) formerly included with live stock, meats and packing house products.
2. Does not agree with sum of items due to revisions which cannot be allocated.

Source: Weekly Report, Carloadings, D.B.S.

Table 56

Note. Newfoundland is included as of 1949.

1. On the first page of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over.
2. Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

Sources: Monthly Report: "Railway Operating Statistics", D.B.S. Annual Report: "Railway Transport", D.B.S.

## FINANCE

Table 57

1. Foreign exchange and foreign securities. Includes gold for following year ends: 1935, 180.5; 1936, 179.4; 1937, 179.7; 1938, 185.9; 1939, 225.7.
2. Industrial Development Bank capital stock, bonds and debentures.
3. Bank premises and all other assets.
4. Before the transfer of Bank of Canada profits, for the year ending December 31st, from "All Other Accounts" to Government of Canada deposits.
5. Capital, rest fund and all other liabilities.

Source: Statistical Summary — Bank of Canada.

Table 58

Note. The classification of chartered bank assets and liabilities was revised by the Bank Act of 1954. Figures for the end of July 1954 are on the new basis and, except for "Other Loans in Canada" (see footnote 5) adjustments have been made to put figures for earlier dates on a comparable basis. Statistics of Newfoundland branches are included as Canadian from April, 1949.

1. Total Cash Reserves include Bank of Canada deposits and Bank of Canada notes. Prior to July, 1954, all figures in this section are daily averages. From July 1954, Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.
2. From July 1954 the figures are not adjusted for items in transit and are not strictly comparable with the figures in this section for earlier periods.
3. Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent calculated as described in footnote 1.
4. Mainly deposits of foreign banks.
5. Including issues payable in foreign currency.
6. Includes securities guaranteed by provincial governments. Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans.
7. Excluding Canadian day-to-day loans.
8. Figures for June 1954 and later are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The transit adjustment at June 30, 1954, would have been + 37.
9. Includes deposits with other banks in foreign currencies, foreign bank notes, gold and coin outside Canada and foreign currency items in transit (net).
10. Includes day-to-day loans, insured residential mortgages, bank premises, shares of and loans to controlled corporations, gold and coin in Canada, Canadian dollar deposits with other banks, non-current loans and other assets.

Source: Statistical Summary — Bank of Canada.

Table 59

Note. Newfoundland data are included as of April 1, 1949.

1. Note circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks.
2. Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada.
3. Chartered banks' public notice deposits in Canada other than

Table 59 — Concluded

- estimated aggregate quarterly minimum balances in personal savings accounts and non-personal notice deposits.
4. Chartered banks' Canadian dollar deposits of provincial governments, Canadian, United Kingdom and foreign banks.
5. Excluding Government of Canada.
6. Cheques and other items in transit (net).

Source: Statistical Summary — Bank of Canada.

Table 61

Note. This series covers 35 clearing centres. Commencing with January, 1953, more comprehensive data covering 52 centres are published in the monthly reports.

1. Commencing with April 1949, Newfoundland is included.

Sources: Annual and Monthly Reports: "Cheques Cashed in Clearing Centres", D.B.S. and Canadian Bankers' Association.

Table 62A

Note. This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada, representing 90 per cent of new ordinary insurance sales.

The sales figures reported for 1954 are unrevised, and therefore not strictly comparable with the sales figures reported for earlier years.

Source: "Monthly Survey of Life Insurance Sales in Canada", Life Insurance Agency Management Association, Hartford, Conn.

Table 62B

1. Ordinary, Industrial and Group

Sources: "Quarterly Report of Death Claims by Provinces" and "Monthly Report of Benefit Payments", The Canadian Life Insurance Officers Association.

Table 63

1. Federal, Provincial and Corporation.
2. Outstanding end of period: Treasury Bills, Deposit Certificates and Short Term Issues sold directly to Bank of Canada and the Chartered Banks.
3. Before giving effect to the issue of \$112 million Quebec Hydro bonds in connection with retirement of Montreal Light, Heat and Power Co-stock.
4. Before giving effect to the issue of \$63 million provincially guaranteed Quebec Municipal Commission bonds re transfer to it of the debt of certain school corporations.

Source: Statistical Summary — Bank of Canada.

Table 64

Note. The number of stocks has varied over the period, the totals shown representing the current coverage.

Source: Monthly Report: "Prices and Price Indexes", D.B.S.

## FINANCE — Concluded

Table 65

Note. Annual data for the years 1944 to 1952 are based on the Department of National Revenue publication "Taxation Statistics". Quarterly data from a selected sample of corporations are used to allocate the annual figures for 1950-1952 by quarters and to project these quarterly totals to 1953 and 1954. For years before 1944, estimates are based on a special study made by the Department of National Revenue.

The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges and charitable donations are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses.

1. Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.
2. Includes, in addition to the industries listed, Tobacco, Rubber, Leather, Non-Metallic Mineral Products, Products of Petroleum and Coal and Miscellaneous Manufacturing Industries.
3. Includes Printing and Publishing and Allied Industries.

Table 65 — Concluded

Sources: "Quarterly Corporation Profits", D.B.S., "National Accounts, Income and Expenditure, 1926-1950", D.B.S.

Table 66

Note. Data refer to assignments made under the Bankruptcy and Winding Up Acts.

1. Quarterly data for the last five columns are monthly averages.
2. In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.
